

Recycling

With over 20 recycle waste streams available to the average UK business, recycling your waste material such as paper, cardboard, plastics, and metal, not only will you be able to reduce your general waste costs, it could also be possible to create new revenue streams from the sale of those recovered materials.

Wynsdale Waste Management can provide a full recycling system, from easy to implement split bin systems through to compactors and baling operations.

Effective waste management can not only help to reduce your overall waste costs, but having some green credentials will also reflect positively in your Corporate Responsibility profile and could be an influencing factor in winning new business.

Confidential Waste

The secure disposal of confidential documents is essential to all businesses and organisations, and confidential waste is not limited simply to your company's records, papers and documents. Other items to be taken into consideration must include: -

- Video, audio tapes, cassettes and discs
- CD's/DVD's
- Photographs
- Blank letterheads and stationery
- Drawings
- Branded clothing, uniforms and merchandise
- ID Cards
- Computer hard drives and memory sticks
- Medical records
- Data sheets and call logs

Wynsdale Waste Management can manage the secure disposal of all of your company's confidential waste, ensuring that everything is disposed of strictly in accordance with current legislation.

You will be provided with a fully documented process including full certification of destruction for your confidential and sensitive waste.

Compliance

It is the responsibility of any businesses producing waste to comply with both national and regional Government policy. All companies have a Duty of Care and social responsibility to manage their waste from cradle to grave.

We ensure that all of our supplier partners have Waste Carriers, Waste Management Licenses, Public Liability, and Employers' Liability Insurances and that we have a clear paper trail for all waste streams.

Wynsdale Waste Management provides a service that conforms to all existing Government Legislation.

FAQs

Why do I need to manage my waste and recycle?

For several reasons....

1. A breach of strict waste control legislation may result in significant fines or even a prison sentence
2. You could secure those bigger contracts by becoming compliant and enhancing your company's Corporate Profile
3. An inefficient waste management strategy can easily cost your business up to 20% more than it should
4. You could improve the efficiency of your operational business
5. You could be damaging the environment
